BUSHBOARD

BB omega

inspirational design

committed to innovation

At Bushboard, we like to push the design boundaries when it comes to worksurfaces. That way you can be confident you are choosing a worktop at the forefront of trends. Our Omega range is an exercise in laminate innovation demonstrating the material's vast potential to deliver a lasting design impression.

Omega centres on design and texture combinations that take laminate to a new sensory level. Where the eye and the touch are pleased simultaneously by the way the worksurface looks and by the way it feels.

Recognising the appeal of natural stone in the kitchen, there are beautiful designs inspired by limestone and granite complemented by a subtle, riven texture. Add to that some exotic woodgrains with the luxurious feel of being freshly sanded. Or the reflective surface of polished stone that accentuates the pearlescent flecks within the design.

Omega worksurfaces marry design highlights with empathetic surface textures. They are exciting and engaging. They are also a byword for outstanding quality.

Ruby Quartz worksurface
and upstand

gorgeous and glamorous

For up-market chic, there is little to beat the luxurious looks of polished stone. Now you can achieve this with our choice of stunning metallic-based, Quartz designs in a host of contemporary colourways. The high definition terrazzo print is delicately flecked with pearlescent particles and topped off with a lustrous high gloss finish. Designer luxury. Yet reassuringly affordable.

When choosing our metallic designs, remember they are just like other high fashion, high gloss worksurfaces and require some TLC to maintain their luxurious looks. So no chopping, cutting or placing hot items directly onto the surface please.

Strass Blanc
worksurface and
splashback

Ebony Stripwood
worksurface

exotic luxury

The allure of exotic woods is irresistible. Omega re-interprets nature's finest species to offer of the moment contemporary styling. The beautifully sumptuous and edgy stripwood design is guaranteed to add design grace. What's more, its stunning visual appearance is enhanced by the sensuous ultramatt texture. This refracts the light beautifully giving an even colour tone the entire length of the worksurface. So it will feel every bit as luxurious as it looks.

Inspirational chic

Be original. Add an elegant design touch with our new Rococo splashbacks. Available in black or white, they are inspired by the trend for texture and pattern in the home.

The flower motif has a beautiful frosted feel with a sophisticated interplay between gloss and matt textures. And the large sheet size available gives you an uninterrupted decorative surface area to enjoy.

Dramatic in black or delicate in white, they will appeal to the individualist in you.

made to last

Quality

Manufacturing with the finest materials is what gives Bushboard worksurfaces their signature quality compared to competitive products. While beautiful and stylish to look at, they are also constructed to cope with the wear and tear of everyday living.

Independently tested to BS/EN438, your Bushboard worksurface is designed to withstand knocks, abrasions, chemicals, cigarette burns, steam, stains from juice, tea, wine or coffee. It is also highly resistant to heat, although we recommend the use of a protective pad as saucepan bottoms can become extremely hot.

Bushboard select E1 grade high-density particleboard for strength and stability. Its homogenous construction generates excellent machining capability for sink cutouts and mitre joints. They are surfaced in Polyrey high-pressure laminate. A resin impregnated moisture resistant barrier combines with Bushboard's unique 'Tekseal' cast resin to completely seal the underside against moisture penetration from everyday spills.

HiGloss Textures and Metallics

HiGloss texture needs a little more care and attention than our Surf and Fa textures. The HiGloss technology offers an advanced level of protection against scuffing, but don't forget this is a fashionable finish that can mark and scratch more easily with everyday use. To maintain the lovely HiGloss look, you should also buff up the surface to a shine after normal wiping down.

The metallic nature of the Quartz and Strass designs are also sensitive to heat so you should take care to use a protective pad. No chopping, cutting or placing hot items directly onto the surface please.

Lifetime Guarantee

Bushboard worksurfaces are guaranteed for their lifetime. Bushboard will make good by repair and/or replacement (at its discretion) any Omega product of its manufacture which can be shown to have failed by reason of defects in its manufacture, that is subject to wear and tear, provided the product has been installed and used in accordance with the manufacturer's instructions and that the products are used for their intended purpose / application. Proof of date and place of purchase required. This guarantee is in addition to your statutory rights as a consumer and does not affect your rights in any way.

Care & Maintenance

Bushboard worksurfaces are so easy to maintain. Unlike other worksurface materials such as timber, composites or granites, they require no regular maintenance or repair. All you need to do is wipe them with a moist cloth and your favourite mild detergent. For more stubborn marks such as fruit juice or coffee, leave the detergent to soak on the surface for a little while before rinsing thoroughly. Obviously, your worksurface can become damaged if mistreated, so we recommend some sensible measures like placing hot pans or casserole dishes on protective mats and mopping up spills quickly. Full details can be found in our Care & Maintenance leaflet. One of these is included with every worktop purchased but if you need a copy please call our Customer Service Team or log onto our website.

Splashbacks

Splashbacks should always be installed at least 130mm from a hob or heat source. Please call us for our Splashback Installation Guide or visit www.bushboard.co.uk

made by Bushboard

Bushboard is the UK's largest independent manufacturer of worksurfaces. With a manufacturing history dating from the 1930's and more than 20 years experience in the production of premium worksurfaces, we are confident about the quality and the style statement our worksurfaces can make to your home. Continual investment, combined with real passion for our business, means we use the latest technologies and manufacturing techniques to keep our products at the forefront of our industry. So confident are we about their superior quality, that all standard Omega worksurfaces carry a lifetime guarantee.

We have an exemplary record in health and safety. Over the last two decades we have received consistent recognition from the industry-recognised RoSPA (Royal Society for the Prevention of Accidents) and BSC (British Safety Council), gaining many awards in the process.

We also take our environmental responsibilities very seriously. In the kitchen industry, we are proactive in encouraging smarter use of 3m and 4.1m worksurfaces to try and reduce over-specification of product when shorter lengths will do the job. It means less off-cuts and waste having to go to landfill. Continued investment in process technology has reduced our waste by 720 tonnes. We bale and recycle all our paper, cardboard and plastic and a further 300 tonnes of waste is burned to efficiently heat our factory.

As a large consumer of chipboard, we ensure that all our material carries the PEFC certification, guaranteeing that it comes from properly environmentally managed and sustainable sources. We have also achieved independent PEFC accreditation to provide surety for 'chain of custody'.
